## **IN THE SPECIFICATION**

On page 10, paragraph [0032], please amend as follows:

[0032] In one embodiment of a beverage composition wherein the individual components of the composition are soluble (e.g., a generally translucent beverage), the acidifier is present in an amount up to the equivalent amount of a calcium component. Examples 1 through 7 described herein present embodiments where the amount of calcium (0.5g/240ml)(100) and the amount of acidifier ((0.336 citric acid g + 0.172 malic acid g)/240 ml)(100) are each 0.21 percent.
